CRICKET CLASH — DOC 3 OF 10

GAMEPLAY REBUILD: 3D Ground, Match Experience, Commentary Content, AR Mode, Cinematics

Everything That Happens Between "BATTLE" and "MATCH RESULT"

Repo: https://github.com/pyushmatania/handcricketgame-8ec46dab **Doc Scope:** This document covers the ENTIRE in-match experience — from tapping BATTLE to seeing the final result. It includes: 3D pitch/ground rendering, ball-by-ball visual experience, all popup cards (over break, wicket, innings change, boundary flashes), complete commentary content pools (500+ lines in English/Hindi/Hinglish), pre-match cinematic sequence, post-match presentation, toss redesign, AR mode, and 10 immersive theme environments.

CHAPTER 1: PRE-MATCH CINEMATIC SEQUENCE

1.1 THE FULL PRE-MATCH FLOW (From BATTLE tap to First Ball)

When the player taps BATTLE and selects a mode, this cinematic sequence plays:

```
Step 1: MATCHMAKING / LOBBY          (0-30 seconds, variable)
Step 2: VS SCREEN                    (3 seconds, fixed)
Step 3: STADIUM ESTABLISHING SHOT    (2 seconds, NEW)
Step 4: TOSS CEREMONY                (6-8 seconds)
Step 5: TEAM LINEUP WALKOUT          (3 seconds, NEW)
Step 6: FIRST BALL                   (match begins)

Total pre-match: ~15-20 seconds of cinematic buildup
```

1.2 STEP 3: STADIUM ESTABLISHING SHOT (NEW)

After the VS screen, before the toss:

Duration: 2 seconds

What happens:

- Camera starts OUTSIDE the stadium — an aerial drone-style shot showing the exterior
- Camera swoops over the entrance gates, past the crowd streaming in
- Camera dives through the tunnel/entrance and into the ground
- Reveals the pitch in all its glory — green outfield, brown pitch strip, stumps set up
- The establishing shot is THEME-SPECIFIC:

Theme	Establishing Shot Description
Gully Cricket	Camera pans down a narrow lane between apartment buildings. Kids are gathering. Someone draws the crease with chalk. The auto-rickshaw driver honks and moves aside. Camera settles on the makeshift pitch.
School Ground	Camera shows the school gate with kids rushing out. Bell rings. Camera follows them to the dusty ground behind the school building. Teacher blows a whistle. Camera settles on the pitch.
Rooftop	Camera rises from street level, past building floors, up to a rooftop with a pitch painted on the concrete. City skyline visible. Wind blows a flag. Camera settles on the terrace pitch.
Beach	Camera skims over ocean waves, past palm trees, onto a sandy beach where stumps are planted. Seagulls scatter. Camera settles on the beach pitch.

Stadium (IPL)	Camera flies over a massive stadium exterior at night, past the floodlight towers, through the players' tunnel with the "IPL" logo above, out onto a pristine green ground. Camera settles at mid-wicket.
Village Ground	Camera moves through a rural village — past fields, a temple, over a pond — to a green maidan where villagers are gathering under a banyan tree. Camera settles on a proper village pitch.

Implementation:

- These are pre-rendered **video clips** (5-10 seconds each, MP4, 720p) or **scripted Framer Motion animations** that pan across a 3D-rendered panoramic image.
- Each theme needs its own establishing shot asset.
- Sound: Theme-appropriate ambient sound builds during the shot (kids shouting for gully, crowd roar building for stadium, waves for beach, etc.)

3D Asset Prompt — Stadium Establishing Shot (IPL Night):

```
Cinematic wide-angle 3D render of a massive cricket stadium exterior at night, Supercell art style, dramatic floodlights creating golden l
```

1.3 STEP 5: TEAM LINEUP WALKOUT (NEW)

After the toss decision is made, before the first ball:

Duration: 3 seconds

What happens:

- The camera is positioned at the end of the players' tunnel looking onto the field
- Your Playing XI walks out in single file, each player doing a signature walk:
  - **Generic players:** Normal walk, looking around the ground
  - **Star players** (if in your XI): Signature entrance:
    - Kohli: Intense stare, punching glove, jaw clenched
    - Dhoni: Calm smile, chewing gum, casual swagger
    - Rohit: Relaxed walk, hands in pockets briefly, then waves
    - Bumrah: Focused, stretching bowling arm while walking
    - Russell: Flexing muscles, shoulders rolling
    - Pant: Bouncy walk, grinning, high-fiving teammates
- The batsmen (openers) peel off toward the pitch and take their positions
- The fielding team spreads to their positions
- Commentary: "And the players are out in the middle! Let's get this game underway!"

Implementation: This can be a simple animation of 11 small character icons walking from left to right across the screen, each character slightly different. Doesn't need to be fully 3D — even 2D character sprites walking across a stylized background works. The KEY is the feeling of a real match starting.

Sound: Stadium PA announcement ("Ladies and gentlemen, please welcome…"), followed by crowd cheer building.

CHAPTER 2: 3D PITCH / GROUND VIEW

2.1 THE MATCH SCREEN LAYOUT (During Gameplay)

└────────────────────────────────────────────────────┘
```

2.2 3D PITCH VIEW — DETAILED RENDERING

The pitch view is NOT a flat image. It's a **3D perspective-rendered scene** showing the cricket ground from a camera position at approximately mid-wicket, slightly elevated (like a TV camera angle).

What's Visible in the Pitch View:

Foreground (bottom of the view):

- The boundary rope (team-colored line/rope at the bottom edge)
- A section of the outfield (green grass, or sand for beach, or concrete for gully)

Midground (center):

- The pitch strip (brown/earthen rectangle) with white crease lines
- Stumps at both ends (3 stumps + 2 bails, visible)
- The batsman character (Supercell 3D style, at the striker's end)
  - In idle stance before each ball (ready to bat)
  - Plays the appropriate shot animation on ball result
- The bowler character (at the non-striker's end)
  - In idle stance before each ball
  - Runs in and delivers on `BALL_BOWLER_RUNUP`

Background (top of the view):

- The stadium/ground environment (theme-specific — see Chapter 10)
- Crowd sections (animated based on CrowdEngine mood)
- Floodlights (if night/stadium theme — animated based on LightingEngine)
- Sky (changes with WeatherEngine — blue for clear, grey for overcast, orange for golden hour)

Per-Theme Pitch View:

Theme	Ground Surface	Pitch Color	Surroundings	Crowd
Gully	Cracked concrete	Chalk lines on concrete	Apartment walls, parked auto, chai stall	5-10 kids on compound wall
			School building, boundary wall, banyan	

School Ground	Dusty red soil	Packed red earth, basic stumps	tree	20-30 students, teacher
Rooftop	Painted concrete	Painted white lines on grey	City skyline, water tanks, clotheslines	8-12 friends on chairs/walls
Beach	Sand	Sandy with shells marking crease	Ocean, palm trees, boats	15-20 beachgoers, lifeguard
Village Maidan	Green grass (patchy)	Natural earth pitch	Temple, fields, banyan tree, pond	50-100 villagers, kids on trees
District Stadium	Maintained grass	Proper pitch, rolled	Small stands, simple scoreboard	2,000 cartoon spectators
Ranji Arena	Quality turf	Good pitch, grass visible	Proper stadium with some cover	10,000 spectators
IPL Stadium	Pristine turf	Professional pitch	Full stadium, LED boards, video screen	40,000+ packed
International	World-class turf	Test-quality pitch	Iconic ground features	60,000-130,000
Night Street	Concrete under streetlight	Chalk on road	Street lamps, parked cars, graffiti walls	15-20 shadowy spectators

3D Asset Prompts for Pitch Views:

Gully Cricket Pitch View:

```
3D render of a gully cricket match scene from a mid-wicket camera angle, Supercell art style, a narrow lane between two colorful apartmen
```

IPL Stadium Pitch View:

```
3D render of an IPL cricket match scene from a mid-wicket camera angle, Supercell art style, pristine green outfield with mow patterns, b
```

Beach Cricket Pitch View:

```
3D render of a beach cricket match scene from a side-on camera angle, Supercell art style, sandy beach surface, coconut shell stumps or d
```

2.3 BALL ANIMATIONS ON THE PITCH

When a ball is bowled and the result is determined, these animations play IN the 3D pitch view:

Dot Ball Animation

```
1. Bowler runs in (small character moves from top of pitch toward camera, 400ms)
2. Ball released (small red circle appears, travels down pitch toward batsman, 200ms)
3. Batsman plays defensive shot (bat comes forward, blocks ball, 100ms)
4. Ball drops at batsman's feet or goes to keeper
5. Batsman taps bat on ground (reset stance, 200ms)
Total: ~900ms
```

Single/Double/Triple Animation

```
1. Bowler runs in (400ms)
2. Ball released and travels (200ms)
3. Batsman hits ball into a gap (shot animation — push/drive, 150ms)
4. Ball rolls across the ground toward a fielder position (300ms)
5. Batsman + non-striker run between wickets (small characters jog between crease lines, 200ms per run)
   - 1 run: 200ms
   - 2 runs: 400ms (back and forth)
   - 3 runs: 600ms (frantic, fielder chasing)
6. Characters return to crease positions
Total: ~1100-1300ms
```

FOUR Animation

```
1. Bowler runs in (400ms)
2. Ball released (200ms)
3. Batsman plays a drive/cut/pull (powerful shot animation — bat swings with visible arc, 150ms)
4. CRACK! sound plays at contact point
```

```
5. Ball RACES to the boundary (fast-moving red dot with speed trail, 400ms)
6. Ball crosses the boundary rope → rope FLASHES in team color
7. "FOUR!" text graphic appears (see Doc 1 spec)
8. Batsman raises bat or points at the crowd (celebration, 200ms)
9. Crowd section animates (some standing, clapping)
Total: ~2800ms (including text flash duration)
```

SIX Animation

```
1. Bowler runs in (400ms)
2. Ball released (200ms)
3. Batsman loads up and SMASHES (big swing animation, bat arc with wind effect, 200ms)
4. MASSIVE CRACK + shockwave ring at contact point
5. Ball launches UPWARD at steep angle (ball gets smaller as it goes up, trail effect, 500ms)
6. Ball DISAPPEARS over the boundary/stands (exits the top portion of the view)
7. In the crowd section: a tiny spectator character CATCHES the ball and jumps up celebrating (300ms)
8. Screen shake (3 jolts, handled by LightingEngine)
9. "SIX!" text graphic CRASHES in (see Doc 1 spec)
10. Firework bursts appear above the stadium/crowd area
11. Batsman celebration (unique per player):
    - Generic: Bat raised above head
    - Kohli: Screaming fist pump toward camera, veins visible
    - Dhoni: Calm bat twirl, nonchalant look
    - Rohit: Casual bat raise, barely celebrating (been there, done that)
    - Russell: Flexes bicep, kisses arm
    - Pant: Jumps in the air, both fists up
    - Surya: 360° spin with bat extended
    - Rinku: Looks to the sky, emotional
12. Crowd: pandemonium (all standing, flags waving, items thrown)
Total: ~3800ms
```

Wicket Animation — BOWLED

```
1. Bowler runs in (400ms)
2. Ball released (200ms)
3. Ball passes the batsman's bat (bat misses — swing and miss animation, 150ms)
4. TIME FREEZE: Everything pauses for 300ms (dramatic effect)
5. Ball HITS stumps:
   - Each of the 3 stumps flies in a different direction (physics-based trajectories)
   - 2 bails cartwheel into the air with rotation
   - Stump debris particles (small wood/splinter pieces)
   - RED FLASH on screen (150ms, via LightingEngine)
6. "OUT!" text appears (see Doc 1 spec)
7. Bowler celebration:
   - Generic: Arms spread wide, running and roaring
   - Bumrah: His trademark arms-wide sprint
   - Starc: Aggressive finger-point at the batsman
   - Rashid: Spinning celebratory dance
   - Bowler's teammates rush to congratulate (3-4 tiny characters run to bowler)
8. Dismissed batsman:
   - Looks down at the shattered stumps
   - Tucks bat under arm
   - Walks away toward the pavilion (head down, slow walk, 500ms)
9. Crowd: bowling team fans celebrate, batting fans quiet
Total: ~4200ms
```

Wicket Animation — CAUGHT

```
1. Bowler runs in (400ms)
2. Ball released (200ms)
3. Batsman edges the ball (bat makes slight contact, ball deflects off the edge, 100ms)
4. Ball arcs in the air toward a fielder position (parabolic trajectory, 400ms)
5. SLOW MOTION activates (the ball and fielder move at 0.3x speed for 800ms):
   - Fielder dives horizontally (stretched out, one-handed)
   - Ball travels toward fielder's outstretched hand
   - Ball LANDS in the hand/glove — squeeze close-up
6. NORMAL SPEED resumes:
   - Fielder rolls on the ground and springs up, lifting ball triumphantly
   - Fielding team rushes for group celebration
7. "OUT!" and dismissal card
8. Batsman walks off
Total: ~4500ms
```

Wicket Animation — LBW

```
1. Bowler runs in (400ms)
2. Ball released (200ms)
3. Ball hits the batsman's pads (thud sound + pad compression animation, 100ms)
4. Bowler SCREAMS appeal (arms thrown up, mouth wide, 200ms)
5. ALL fielders appeal (multiple characters with arms up, 300ms)
6. DRAMATIC PAUSE: Camera angle shifts to show the umpire from behind (over batsman's shoulder)
7. Umpire slowly raises finger (finger goes from hip to full extension over 1200ms):
   - 0-400ms: Umpire's hand starts moving
   - 400-800ms: Hand at chest height, slight pause (building tension)
   - 800-1200ms: Finger reaches full height — "OUT!"
8. "OUT!" text and red flash
9. DRS option flashes briefly (if available): "REVIEW? [TAP] — 5 seconds"
10. Celebrations and walk-off
Total: ~5000ms (longest wicket type due to umpire drama)
```

Wicket Animation — RUN OUT

```
1. Batsmen running between wickets (both characters moving, 300ms)
2. Fielder picks up ball (bend and scoop animation, 200ms)
3. Fielder throws at stumps (ball travels as a fast line toward the stumps, 200ms)
4. DIRECT HIT — ball smashes stumps with batsman still short of crease
5. Split-screen effect: Top-down view replays the run-out in third-umpire style:
   - Green/red traffic light graphic
   - "CHECKING..." text for 800ms
   - "OUT — SHORT OF THE CREASE" with red light
6. Regular celebrations and walk-off
Total: ~4500ms
```

CHAPTER 3: COMMENTARY CONTENT POOLS

3.1 ENGLISH COMMENTARY — COMPLETE POOL

DOT BALL (40 lines)

```
export const EN_DOT_BALL: CommentaryLine[] = [

- English: ~350 lines
- Hindi: ~300 lines
- Hinglish: ~300 lines
- Theme-specific additions: ~150 lines (across all themes)
- **GRAND TOTAL: ~1,100 commentary lines**

CHAPTER 4: POST-MATCH PRESENTATION

4.1 POST-MATCH CINEMATIC (NEW — Your Request)

After the Match Result screen, before returning to Home, a **post-match presentation** plays. This mimics real cricket post-match presentations on TV.

The Sequence (8-12 seconds)

```
1. GROUND SHOT (2s):
   Camera shows the 3D ground from an elevated angle.
   Winning team players are celebrating on the pitch.
   Losing team walks off toward the pavilion.

2. PRESENTATION PODIUM (2s):
```

```
   Scene transitions to a small podium/stage set up at the ground.
   A commentator character walks to the mic.
   A "Player of the Match" trophy is on a small table.

3. PLAYER OF THE MATCH (3s):
   The star performer walks up to the podium.
   Their 3D character model is shown in a close-up.
   Their performance summary scrolls:
     "Virat Kohli — 78 off 42 balls, 8 fours, 4 sixes"
   Commentary: "[Player name] played an outstanding innings today!"

4. WINNER ANNOUNCEMENT (2s):
   "[Team] win by [X] runs / [X] wickets!"
   Confetti burst in team colors.
   Winning team logo displayed prominently.

5. DISMISS (1s):
   "TAP TO CONTINUE" → returns to Match Result screen or Home
```

Theme-Adaptive Presentation

Theme	Presentation Style
Gully	No podium — just friends arguing about who was the best. Commentary is trash-talk. “Arre tu toh kuch nahi kiya, chal side ho!”
School Ground	Teacher character gives the “award” (a chocolate or gold star). Commentary is school-style. “Aaj ka sabse accha player — 10/10!”
Classroom	Principal character announces over PA system. Kids cheer.
Stadium/IPL	Full professional presentation with microphone, sponsor boards, trophy. Formal commentary.
Beach	Relaxed — players sit on the sand, commentary is chill. “Mast game tha yaar. Chalo ab coconut water piyo.”
Village	Village elder gives a coconut or garland as the “award.” Desi commentary.

CHAPTER 5: 10 IMMERSIVE THEMES

Each theme is a complete environment that changes: pitch view background, establishing shot, commentary tone, ambient sounds, crowd type, weather probabilities, and post-match presentation style.

5.1 THEME LIST

#	Theme Name	Unlock Condition	Visual Mood	Time of Day
1	**Gully Cricket**	Free (starter)	Urban, colorful, chaotic	Afternoon
2	**School Ground**	Level 3	Dusty, nostalgic, fun	Morning/Afternoon
3	**Rooftop**	Level 5	Urban, elevated, breezy	Evening/Night
4	**Beach Cricket**	Level 7	Tropical, relaxed, sunny	Sunset
5	**Village Maidan**	Level 10	Rural, earthy, community	Afternoon
6	**Night Street**	Level 12	Dark, gritty, underground	Night
7	**District Stadium**	Level 15	Semi-pro, growing scale	Day/Night
8	**Ranji Arena**	Level 18	Professional, serious	Day/Night
9	**IPL Stadium**	Level 22	Grand, electric, spectacle	Night
10	**International Arena**	Level 25	World-class, historic, packed	Day/Night

5.2 PER-THEME SPEC TABLE

Aspect	Gully	School	Rooftop	Beach	Village	Night Street	District	Ranji	IPL	Inte
Ground Surface	Cracked concrete	Red soil	Painted concrete	Sand	Patchy grass	Road surface	Maintained grass	Quality turf	Pristine turf	Wo
Stumps	3 sticks + rubber bands	Wooden basic	Bricks stacked	Coconut shells / driftwood	Bamboo	Rocks or cans	Proper wooden	Professional	Professional	Pro
Ball Type	Tennis ball (yellow-green)	Tennis ball	Tennis ball	Tennis ball	Rubber ball (red)	Tennis ball under streetlight	Leather ball (red)	Red leather	White leather	Rec
Crowd Count	5-10 kids	20-30 students	8-12 friends	15-20 beachgoers	50-100 villagers	15-20 shadowy figures	2,000	10,000	40,000+	60,
Commentary Tone	Street slang, trash talk, gaslighting	School humor, teacher references	Casual bro talk, city vibes	Chill, relaxed, tropical	Desi, earthy, rural	Intense, underground, hype	Semi-professional	Professional	Full IPL broadcast	Elit
Ambient Sound	Traffic, dogs barking, vendors calling	School bell, kids playing, birds	Wind, distant traffic, pigeons	Waves, seagulls, wind in palms	Cows, temple bells, birds, kids	Crickets, distant music, cars	Moderate crowd + PA system	Large crowd + announcement	Massive crowd + music + DJ	Hug
Weather Options	Clear, Dust Storm, Golden Hour	Clear, Overcast, Golden Hour	Clear, Night, Overcast	Clear, Golden Hour, Drizzle	Clear, Overcast, Golden Hour	Night only	All options	All options	Mostly Night Lights	All
Boundary Rule	Ball hits compound wall = 4, over wall = 6 + fetch	Ball crosses line drawn in dust	Ball goes over railing = 6 (you fetch from downstairs)	Ball goes in water = 6 + auto-out (lost ball!)	Ball into pond = 6, into field = 4	Ball under car = dead ball, on car = 4	Rope boundary	Rope boundary	Rope boundary	Rop
Special Element	Auto-rickshaw blocks a shot sometimes (random dead ball)	Teacher blows whistle for lunch break (time pressure)	Pigeon lands on pitch (funny dead ball)	Wave washes the crease (rain equivalent)	Cow wanders onto pitch (dead ball, everyone laughs)	Streetlight flickers (momentary darkness)	PA announcements	TV replays on screen	Full LED board + DJ + fireworks	His refe
3D Ground Prompt	See Chapter 2 above	See Chapter 2	City rooftop with skyline, concrete surface, water tanks, chairs	Sandy beach with ocean, palm trees, boats	Green maidan, banyan tree, temple backdrop, pond	Street at night, streetlights, graffiti walls, parked cars	Small stadium, basic stands, scoreboard	Proper stadium, decent crowd, floodlights	Massive IPL arena, LED boards, packed	Icon (Wa

---

CHAPTER 6: AR MODE (Augmented Reality)

6.1 CONCEPT

The player can switch to AR mode where their **phone camera** shows the real world, and the cricket ground is rendered ON TOP of it — on their desk, floor, or any flat surface. The hand selector buttons are overlaid on the camera feed. It feels like you're playing cricket on your actual desk.

6.2 TECHNICAL APPROACH

Use **WebXR** (for browsers that support it) or **MediaPipe + Three.js** for a custom AR solution:

```
// AR Mode Flow:
// 1. Camera feed displayed as full-screen background
// 2. Plane detection: find a flat surface (table, floor)
// 3. Place the 3D cricket ground model on the detected plane
// 4. Ground model includes: pitch, stumps, two player characters, boundary markers
// 5. When ball is bowled, animations play ON the 3D ground model
// 6. Hand selector UI overlaid on bottom of screen (same as regular mode)
// 7. Camera can move — the ground stays anchored to the surface (6DOF tracking)
```

Implementation with Three.js + Camera

```
// Simplified AR setup
import * as THREE from 'three';

// 1. Camera feed as background
const video = document.createElement('video');
navigator.mediaDevices.getUserMedia({ video: { facingMode: 'environment' } })
  .then(stream => { video.srcObject = stream; video.play(); });

// 2. Three.js scene with camera feed as background texture
const scene = new THREE.Scene();
const videoTexture = new THREE.VideoTexture(video);
scene.background = videoTexture;

// 3. Place cricket ground model
const groundModel = loadGLTF('/models/cricket_ground.glb');
groundModel.position.set(0, -0.5, -2); // In front of camera, slightly below
groundModel.scale.set(0.3, 0.3, 0.3); // Small enough to fit on a table
scene.add(groundModel);

// 4. Ball animations play on the model
// (Same animations as regular mode but rendered in 3D on the model)
```

Hand Tracking (Stretch Goal)

If the device supports hand tracking (via MediaPipe Hands — already in the project's dependencies):

- Detect the player's hand showing 1-6 fingers
- Instead of tapping a button, the player SHOWS their hand to the camera
- The game reads the number of fingers and uses that as their pick
- This makes it TRUE hand cricket — no buttons, just hands!

```
// Hand gesture detection
import { Hands, HAND_CONNECTIONS } from '@mediapipe/hands';

const hands = new Hands({ locateFile: (file) => `/mediapipe/${file}` });
hands.setOptions({ maxNumHands: 1, minDetectionConfidence: 0.7 });

hands.onResults((results) => {
  if (results.multiHandLandmarks.length > 0) {
    const landmarks = results.multiHandLandmarks[0];
    const fingersUp = countFingersUp(landmarks);
    // fingersUp = 1 to 5 (thumb counts as 1, or 6 if all fingers + thumb spread wide)
    submitHandPick(fingersUp);
  }
});
```

AR Mode Visual

- The 3D ground model is a miniature cricket pitch (~30cm on the real surface)
- Two tiny character models (batsman + bowler) on the pitch

- When a boundary is hit, small firework particles pop above the model
- When a wicket falls, the tiny stumps fly apart on the model
- The boundary markers are visible as small glowing lines around the pitch
- The scoreboard is overlaid on the screen (not in 3D) — same UI as regular mode

AR Ground 3D Asset Prompt

```
3D model of a miniature cricket ground designed for AR placement on a flat surface, Supercell art style, a small rectangular green pitch
```

CHAPTER 7: SPECIAL IN-MATCH EVENTS

7.1 THEME-SPECIFIC RANDOM EVENTS

Each theme can trigger random humorous events that add personality:

Theme	Event	Trigger	Effect	Animation
Gully	Auto-rickshaw blocks shot	5% per ball	Dead ball, re-bowl	Auto-rickshaw model drives across the pitch, batsman looks annoyed
School	Teacher whistle for lunch	After over 8 (if 10-over game)	“Last 2 overs! Bell is about to ring!” commentary, slight urgency boost	Bell sound, teacher character appears at edge
Beach	Wave washes crease	3% per ball	Dead ball, pitch “washed” animation, re-bowl	Water effect sweeps across the bottom of pitch
Village	Cow wanders onto pitch	2% per ball	Dead ball, everyone waits and laughs	Cow character walks slowly across, players wave it off
Night Street	Streetlight flickers	5% per ball	Screen briefly goes dark (200ms) then back, batsman has -10% technique for that ball	Flicker effect on the lighting
Rooftop	Pigeon lands on pitch	3% per ball	Dead ball, funny moment	Pigeon character lands, batsman shoos it away

These events are RARE, BRIEF, and HUMOROUS — they add personality without disrupting gameplay. They ALWAYS result in a dead ball (re-bowl) so they don’t affect the score unfairly.

7.2 SUPER OVER (Tied Matches)

If a match is tied after both innings:

```
1. "MATCH TIED! SUPER OVER!" text slams in (Bungee 40px, team-colored)
2. Dramatic drum roll sound
3. Each team gets 1 over (6 balls) to bat
4. Choose 1 batsman + 1 bowler each
5. Higher score wins
6. If STILL tied: Sudden death — 1 ball each, higher score wins
7. If STILL tied after 3 sudden death rounds: Count total boundaries
```

7.3 STRATEGIC TIMEOUTS (T20 Mode)

In T20 matches:

- Each team gets ONE strategic timeout (like real IPL)
- Trigger: Tap a “TIMEOUT” button that appears at over ends (overs 6-16 only)
- During timeout: A 30-second screen showing team stats, required rate, suggested strategy

- Commentary: “Strategic timeout called. Let’s see if this changes the momentum.”
- This is optional — player can skip it

CHAPTER 8: 3D ASSETS FOR THIS DOC

#	Asset	Size	For
1-10	Pitch view backgrounds (10 themes)	1080×600 each	Match screen background
11-20	Establishing shot panoramas (10 themes)	1920×1080 each	Pre-match cinematic
21	Batsman character (batting stance)	256×256	Pitch view
22	Batsman character (drive shot)	256×256	Four animation
23	Batsman character (big swing)	256×256	Six animation
24	Batsman character (defensive prod)	256×256	Dot ball
25	Batsman character (walking off dejected)	256×256	Wicket
26	Bowler character (run-up)	256×256	Ball delivery
27	Bowler character (celebration arms wide)	256×256	Wicket celebration
28	Fielder character (diving catch)	256×256	Caught animation
29	Umpire character (finger raised)	256×256	LBW
30	Stumps flying apart (sprite sheet)	512×128	Bowled animation
31	Ball sprite (red cricket ball)	32×32	Ball trajectory
32	Ball trail effect	128×16	Ball trajectory
33	Firework burst sprites (5 variants)	64×64 each	Six celebration
34	Spectator catching ball	128×128	Six in stands
35	Post-match podium (professional)	512×300	Post-match presentation
36	AR miniature cricket ground (3D model)	GLTF/GLB	AR mode
37	Cow character (village theme)	128×128	Random event
38	Auto-rickshaw (gully theme)	128×128	Random event
39	Pigeon (rooftop theme)	64×64	Random event

This Doc 3 covers the complete gameplay experience from BATTLE tap to final result: pre-match cinematic sequence (establishing shot + lineup walkout), 3D pitch view with per-theme rendering specs and asset prompts, ball-by-ball animations for every result type (dot/runs/four/six/5 wicket types) with millisecond timings, 1,100+ commentary lines across English/Hindi/Hinglish with theme-specific variants (gully trash talk, school humor, stadium professionalism), post-match presentation with theme-adaptive styles, 10 immersive themes with complete spec tables, AR mode with hand tracking, and special random events (cow on pitch, auto-rickshaw blocking shots). Feed alongside Doc 1 (UI) and Doc 2 (Engines).
